PREPARATIONS FOR THE NEXT STATE AGRICULTURAL FAIR.

Electric-Light Poles on Broad Street to be Removed-Competitive

The Executive Committee of the Virginia State Agricultural Society beld their regular quarterly meeting at the White Sulphur Springs last week.

The gentlemen appointed to obtain permission from the Electric-Light Committee to remove the poles on Broad street, so as to enable steam-cars to run during the State Fair, reported that they had obtained such permission, and Messrs. R. E. Blankenship and John S. Ellett were appointed a committee to contract with the Electric-Light Com-

pany for the removal of the poles. The president was authorized to enter into and complete the proper legal contracts with the Richmond, Fredericksburg and Potomac Railroad Com pany, and with the City Railway Company, for running steam-cars during the State Fair.

On motion, the president, General

Williams C. Wickham, and General W. H. F. Lee were appointed a committee to wait upon President Cleveland, present the official invitation of the Society, and arrange for the day and time of his coming and for his reception at the State Fair.

Colonel Duke, of the committee ap pointed at the April meeting to formulate a plan for the reorganization of the State Department of Agriculture, read a bill prepared by the committee for that purpose, which was, on motion, laid on the table and made the special order for August 12th at 12 M. The communittee adjourned to 11 A. M. August 12th.

After consideration the president was authorized to arrange for competitive military drills during the State Fair, provided the City Council grant the appropriation asked for by the So-

ciety.

After disposing of various business matters in reference to the coming Fair the committee.

M., together with delegates from Fair the committee, at 12 different agricultural societies of the State, who were present by invitation extended at the April meeting, went into the consideration of the bill prepared by the committee for the reorganization of the State Department of Agriculture.

The bill was first read as a whole and then by sections, and, after a very thorough discussion of each section was, after a number of amendments. unanimously adopted and ordered to be printed, to be referred for consideration to the various agricultural associations in the State, who were each requested to send a delegate to a meeting to be held in Richmond on the 20th day o October to perfect the bill, at which meeting each society or association shall have one vote.

The State Fair takes place October

20th, 21st and 22d.

ABOUT THE LEE MONUMENT. Letter from Governor Lee to the City Clerk.

The following letter was yesterday sent by the Governor to Mr. B. T. August, City Clerk : "COMMONWEATHH OF VIRGINIA.

I lost all hope in that country and sailed for America, and was treated at Rockevelt, in this city, as well as by a prominent physician in New York having no connection with the hospitals. I saw the advertisement of Swift's Specific, and I determined to give it a trial as a last resort. I had given up all hope of being cured, as I had gone through the hands of the best medical men in Nottingham and New York. I took six bottles of S. Sunday, as Mr. Charles Bowie, of Petersburg, was coming in on a Rich-mond-bound freight train he fell from the rear platform and received very serious injuries. When the train was in about two miles of Manchester his har blew off, and in trying to catch it he lost his balance and fell. No one on the train saw him fall, and nothing was known of the accident until some time afterward, when an old colored Dr. Dorsett was summoned, and upon examination found that the young man's right leg was broken at the knee and the knee-pan was snapped. Mrs. Bowie came over yesterday to be with her son antil be can be taken home.

The insurance on the Old Deminion Cotton-Pactory, which was damaged to the extent of about \$20,000 by the recent disastrous fire, in which Buck & Heif's mill was burnt down, has all been adjusted, and hands are now es. gaged-and have been for several days-repairing the building. It is thought that the repairs can be completed and operations resumed by some time in September. Over 200 employees, mostly poor women and girls, were employed here, and for their sakes as well as for that of the owners of the property it is fortunate that operations can be resumed at so early a day, as only a few of them have temporary employment, and they are largely dependent upon their weekly earnings for a livelihood.

The feat was one that required both nerve and agility. The porter was not at all hurt.

RICHMOND VA., TUESDAY MORNING AUGUST 17, 1886.

Histop Keape's Views on the Effect of the Pope's Condemnation.

The National Republican, of Wash

The National Republican, of Washington, D. C., says in its issue yesterday: Bishop Keane, of Richmond, who has been spoken of as Cardinal Gibbons's coadjutor, was in the city for a few hours Saturday, and was questioned by a reporter of the Republican as to the effects which a general condemnation of the Knights of Labor would have on the membership of the Catholic Church. Said he: "It is hardly lie Church. Said he: "It is hardly worth while to contemplate effects be fore there is any palpable cause at hand. The condemnation of the Canadian knights has not, as far as I can see, any reference to the labor or-ganizations in the United States. There may have been special reasons calling for the Church's anathema in Canada which do not exist here. Anyhow, the man, who was passing by, found Mr.
Bowie lying on the ground, took him
up and brought him to the residence of
his uncle, Mr. E. B. Howle, in this city.

Knights of Labor are certainly under
no ban in this country so far. Perhaps it is not generally known, but it
is a fact, that even if the letter received
by Cardinal Teachersu applied to the Knights of Labor are certainly under by Cardinal Tascherau applied to the United States, the Knights need not pay any attention to it until it is promul-gated through the proper authoritie here. No decree has effect before pro-mulgation. So I think there is little cause for all of this excitement and these surmises as to what action the Knights will take. Still, as there have been published statements to the effect that the Pope's condemnation would result in the withdrawal from the Church of the Catholic Knights, I will tell you that we have no such fear.
All Catholics know that solemn decrees from Rome are not given out immedistely, but only after long and careful deliberation, and after taking and weighing all the testimony accessible. Rome's tribunal is the slowest on earth in its judgment, but once that judgmen is given it is sure to be right ! Catho lies know this. It is one of the articles of their faith that the Pope, speaking in his official character, cannot err. When he condemns any doctrine or practice, we can believe as firmly as in the existence of God that the doctrine or practice is bad and deserves condemnation. If, then, the Pope should call on all Catholics to withdraw from the Knights of Labor organization, I am sure that all who deserve the name would obey without hesitation. There would, of course, be a few so-called Catholics who would make a great deal of noise denounce the Pope and Papal infallibil-Insurance Company of New York for ity, and make a great show of leaving the Church, of which they have only been nominal members; but I have n fear that the worthy children of the Church will not guide their action by the Holy Father's words. Let me repeat.

however, that I have no expectation of a condemnation directed at the Knights here. Many of the prelates bave looked into their constitution and purpose, and declare them to be alto-Monroe-Ward Reform Club.

They have assured me time and again that there are no blind oaths taken, and have even submitted to me regularly journals of the proceedings of hall in the ward. their meetings. They could have no object

in deceiving me. On the contrary, they seem particularly anxious that I should become acquainted with all the workings of their organization, so that I might become convinced that their laws and purposes are not in violation of any of the Church's ordinances. You may

Jerusalem contains many buried se-

crets. In some places sixty, seventy, and even as much as 100 feet of rubbish has been accumulated over what was at a former period the surface of the ground. The first great beginning

of this heaping up of the fragments of destruction may be dated at the time when Nebuchadnezzar took Jerusa-lem and carried off the inhabitants to "the rivers of Babylon." At that time Nebuza-Adan, who commanded the Chaldeans, "burned the House of the Lord," and it is also stated that "the Chaldeans burned the King's house and the houses of the people with fire, and brake down the walls of Jerusalem." This must have been a very complete demolition, and the result necessarily produced a very large archæological deposit. The unfortunate city has undergone many similar operations since that time, and on each occasion the new stratum of remains has been laid down. Let any one, however little he may have read on the sub-ject, throw his thoughts back on such a history, and he will easily conceive what may be hid under the streets of modern Jerusalem. It is to Sir Charles Warren, the present first com missioner of police, who, as Captain Warren, acted for the Palestine Exploration fund, that we owe our first glimpses of "Underground Jerusalem." He told us in exact figures of the great depth of rubbish which had gathered in the valleys, and which, in spite of the filling up, are still visible in the ancient city. The work of Sir C. Warren cleared up some points that were formerly doubtful, but much re-mains obscure. There are many problems regarding the old topo-graphy which cannot be solved till further excavations are made. Prominent among the points requiring light to be thrown on them are the exact positions of the Temple and the Holy Sepulchre. The questions have not only a historical and archeological interest, but the whole Christian world has naturally a deep anxiety to know the exact truth regarding them. At present no excavations can be carried on; the Porte refuses all applications able arrangements can be made for the for permission to explore where digging might at present be done, and it is only when the foundations of a house require

> Such a chance has lately taken place. A new hotel had to be built near the Jaffa Gate. This was the Mediterra-nean Hotel, which, as visitors to Jerusalem will remember, formerly stood not far within the Damascus Gate. The spot where this took place may be described in the words of the account which has come home. It is "at the head of David street," not named directly from the royal Psalmist, but from the Tower of David, which stands at the end of it. Here, in clearing out the foundations, old walls, canals, and cisterns were laid bare; but the most
